

BUILD INSTRUCTIONS

CARGO CONTAINERS

One cargo container with door ends. Every Cargo Containers series builds the same way.

USE FOR Cargo Containers Series 1–6

SERIES	STEPS
2	5

BEFORE YOU START

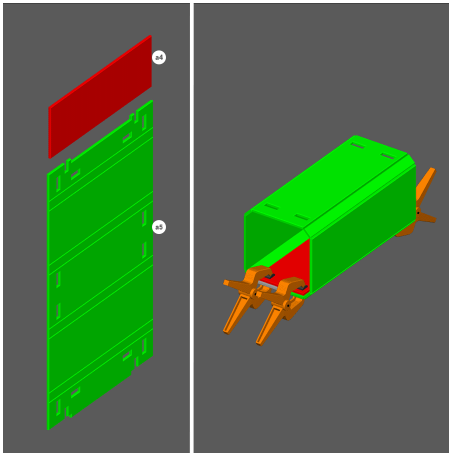

- White PVA craft glue. We use Aleene's Turbo Tacky: the bottle for big jobs, a glue pen for fine beads.
- Small clamps to hold pieces while they dry.
- Precision tweezers or a pointed tool for punching out small pieces and slots.

TIPS & TRICKS

- The **front** of a sheet is the side the die cut went into; it has the rolled edges. The **back** is flat.
- Pieces punch out most easily when pushed from the back.
- Fold every score fully so its edge is crisp and straight. It's cardboard, so it sometimes needs a little help.
- Be a *little* generous with glue. It wipes up with a dry or slightly damp paper towel and dries clear.
- Glue marks and their targets always match in shape and size.

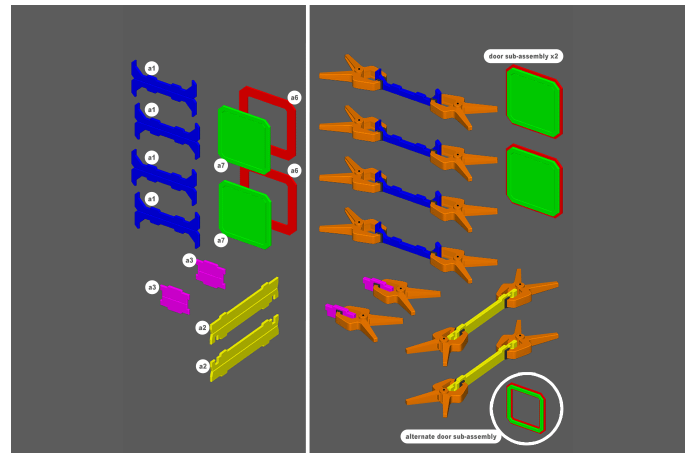

1

STEP 1 OF 5

1. Fold, glue, and clamp as shown.

2

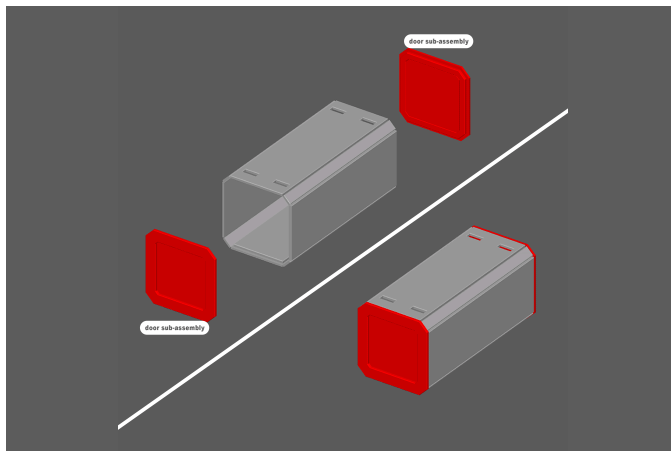

STEP 2 OF 5
DOOR SUB-ASSEMBLIES

1. Glue pieces **a7** and **a6** together as shown to make two door sub-assemblies.
2. Fold, glue, and clamp other pieces as shown.

NOTE You can pop out the center of **a7** to leave the cargo container ends open.

3

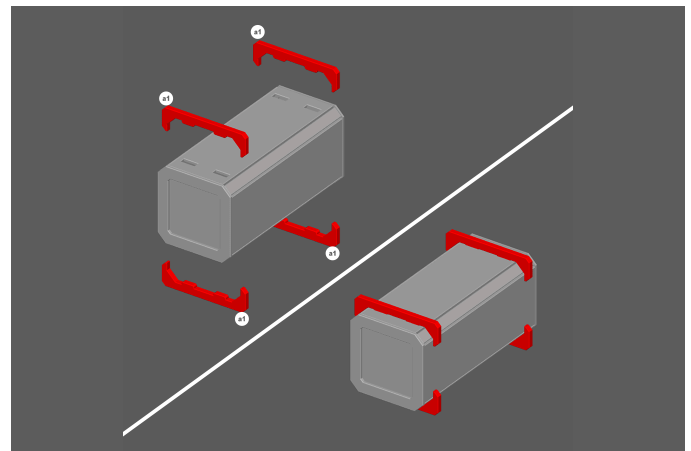

STEP 3 OF 5

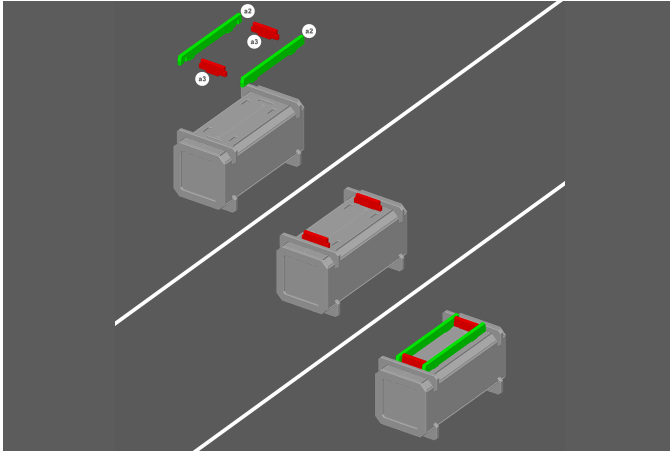

1. Glue door sub-assemblies to the body as shown.

4

STEP 4 OF 5

1. Glue pieces **a1** to the body as shown.

1. Glue pieces **a3** to the body as shown.
2. Then glue pieces **a2** to the body as shown.
