BUILD INSTRUCTIONS

TANKER & CRATE CONTAINERS

Three builds in one set: a rail-car fuel tanker, a rail-car crate container, and three nesting cargo crates.

USE FOR Tanker & Crate Containers (Neutral, Abandoned)

SERIES	STEPS	BUILDS
2	9 + 9 + 6	Tanker, container, crates

BEFORE YOU START

- White PVA craft glue. We use Aleene's Turbo Tacky: the bottle for big jobs, a glue pen for fine beads.
- Small clamps to hold pieces while they dry.
- Precision tweezers or a pointed tool for punching out small pieces and slots.

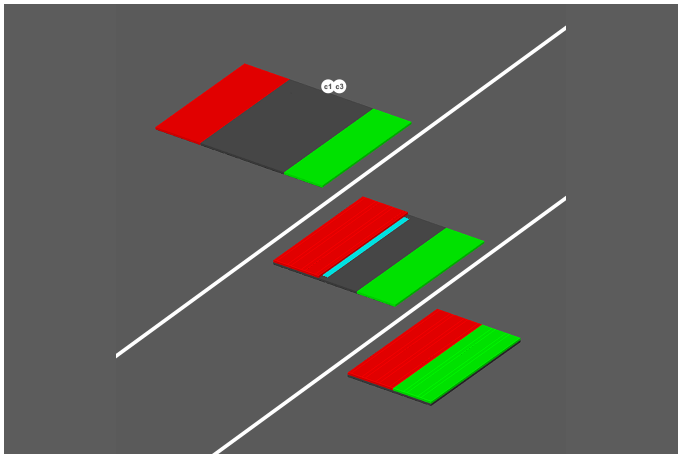

TIPS & TRICKS

- The **front** of a sheet is the side the die cut went into; it has the rolled edges. The **back** is flat.
- Pieces punch out most easily when pushed from the back.
- Fold every score fully so its edge is crisp and straight. It's cardboard, so it sometimes needs a little help.
- Be a *little* generous with glue. It wipes up with a dry or slightly damp paper towel and dries clear.
- Glue marks and their targets always match in shape and size.
